

RITIK MEHTA

(226) 961-3847 | ritikmehta1999@hotmail.com | [linkedin.com/in-ritikmehta-](https://www.linkedin.com/in-ritikmehta-) | [Portfolio](#) | Toronto, ON, Canada

Experienced **Developer** with 2+ years of expertise in **Angular, ReactJS, Spring Boot, and Node.js**, skilled in building scalable applications. Contributing to OpenSource Projects with Proficient in cloud platforms like **Azure** and **OpenShift**, with hands-on experience in CI/CD pipelines, **containerization**, and **microservices Architecture**. Passionate about continuous learning and problem-solving, having solved 400+ LeetCode problems

PROFESSIONAL EXPERIENCE

Tech Savi (Contract - PartTime) Toronto, Canada
Full Stack Developer January 2025 – June 2025

- Tech Stack: **HTML, CSS, JavaScript, ReactJS, Angular, Node.js, Python, Azure, Git, JIRA, Confluence**
- Designed and integrated **RESTful APIs** with **Node.js**, enabling seamless communication between front-end and back-end services and ensuring scalable system architecture.
- Automated server provisioning using **Ansible**, reducing setup time by 50%, and implemented secure user authentication with role-based access control via Azure Active Directory for over 1,000 users.
- Streamlined development and deployment processes using GitHub Actions CI/CD, integrating **Azure** services for database, authentication, and hosting, achieving 99.9% uptime and scalability.

Royal Bank of Canada Toronto, Canada
Software Developer Intern (Developer) January 2024 – August 2024

- Tech Stack: **Angular (Routing, NgRx, RxJs), TypeScript, Java, Spring Boot, Node, Maven, Jenkins, Docker, Git, OCP4 (Container), Python (for ML scripting), Azure Cognitive Services.**
- Assisted in migrating **Spring Boot** applications from **Pivotal Cloud Foundry (PCF)** to **OpenShift Container Platform 4 (OCP4)**, contributing to improved scalability and resilience by 30%, and Supported integration of **Kafka** and **Elastic Search** with Active Directory environments to enhance system performance.
- Helped configure **Kubernetes** pods and implemented **Horizontal Pod Autoscaling** and **CronJob** Scheduling, boosting resource utilization efficiency and application reliability by 85%.
- Documented and helped in designing RESTful APIs using **Swagger (OpenAPI 3.0)** and tested by **postman**, ensuring clear interface specifications.
- Enhanced application performance and scalability by implementing **Cache as a Service** using **Armada** and **Dynatrace** and integrating IVR systems with **Omilia** to improve customer interaction capabilities.
- Developed robust test cases using **JUnit** and **Mockito**, achieving over 55% code coverage on **SonarQube** and ensuring effective application monitoring with **Log4J** for improved reliability and quality assurance.
- Collaborated with Senior Developers and participated in team knowledge-sharing sessions on **Spring Boot** and **Git** workflows.

Frontline VR India Venture Delhi, India
Software Engineer Intern May 2022 – December 2022

- Tech Stack: **ReactJS, JavaScript, Node.js, MongoDB, Microservices Architecture.**
- Spearheaded the development of a customer-facing platform using **ReactJS** and **MongoDB**, achieving rapid growth to 2,000 active users within 3 days of launch.
- Conducted rigorous testing using **Jest, Postman**, and **Selenium**, ensuring the reliability, functionality, and seamless integration of various components in the platform.
- Developed and deployed APIs to enhance integration capabilities and ensure seamless communication between services, improving system scalability by 40%

TECHNICAL SKILLS

Programming Languages: Java (Version 8+), C, TypeScript (Version 4.0+), JavaScript (ES6+), Python (Scripting)
Web Technologies: Angular (Version 12+, RxJS, NgRx (State Management), Lazy Loading, Reactive Forms, Angular Material, Dependency Injection, Custom Directives, Pipes, Angular Universal (Server-Side Rendering), Routing and Guards, Two-Way Data Binding, Lifecycle Hooks, Observables, Change Detection Strategy, Form Validation), React.js and Node.js, Express.
Database: SQL (MySQL), NoSQL (MongoDB), In-memory (Redis), Prisma (ORM) / Mongoose
Version Control Systems & Management: Git, GitHub, GitLab, JIRA
Frameworks: Spring Boot (MVC, JPA, REST, Microservices, Spring Security, Spring Data, Spring Cloud, Spring AOP, Spring Batch, Actuator, OAuth2, Hibernate)
AI & Data Tools: TensorFlow, scikit-learn, Azure Cognitive Services, OpenAI API integration (LLM), Pandas, NumPy
Other Tools: Azure, OpenShift Container Platform 4 (OCP4), PCF, Armada, Dynatrace, GitHub Actions, Docker, Kubernetes

PROJECTS

RoleSim: Job-Aware Multi-Agent Interview System ([Github](#)) September 2025
Developer, RoleSim

- Built a production-grade Generative-AI interview platform with **Next.js (TypeScript)** and **Tailwind CSS**, featuring a responsive real-time chat UI and a modular, DRY architecture with clearly separated layers (agents, services, repositories, clients) for **scalability** and **maintainability**.
- Integrated **Server-Sent Events (SSE)** to stream LLM-generated interview questions in real time, including **retrieval-augmented generation (RAG)** using Supabase **pgvector**, **OpenAI GPT-4 embeddings**, and dynamic **citations**.
- Built a multi-agent workflow (Interviewer, Evaluator, Tutor) with **LangChain / LangGraph** concepts and **Neo4j graph** support for competency mapping and adaptive question planning.
- Developed secure Next.js API routes with input validation (Zod), error handling, and role-based session management.
- Implemented Supabase Postgres backend with pgvector indexing and RPC similarity search for high-performance semantic retrieval
- Added Tutor feedback engine to generate personalized micro-lessons and targeted practice questions based on evaluation scores.

Microservices: Based Order & User Management System([Github](#)) August 2025
Developer

- Built **User Service** and **Order Service** and **other service** with Spring Boot REST APIs for user management and order processing.
- Integrated **Kafka** for event-driven communication and tested endpoints using **Postman**.
- Containerized with **Docker** and deployed on **OpenShift**, ensuring scalability and modular design.
- Implemented distributed tracing with **Spring Boot** and **Sleuth + Zipkin**, enabling end-to-end visibility across microservices and reducing debugging time by 40%.

EDUCATION

Master of Applied Computing October 2024
University of Windsor, Windsor, Canada **GPA: 78.22/100**

Bachelor of Technology, Computer Science & Engineering. August 2022
Dr. A. P. J. Abdul Kalam Technical University, Uttar Pradesh, India **GPA: 82.8/100**

CERTIFICATIONS

LinkedIn Certified: Java Algorithms ([Link](#)) March 2023
LinkedIn Certified: Fundamentals of Dynamic Programming ([Link](#)) May 2023
